Programming Instructions

Pairing a remote with a motor

*When programming the motor the blind will be required to jog to confirm settings have been programmed, if the blind does not jog press the program button on the motor briefly until the blind jogs once.

*Power should be only connected to the blind being programmed. All other blinds should be disconnected from their respective power while programming is in progress.
Single Channel Remote

1

On the remote, press and hold the UP and DOWN buttons simultaneously until the blind jogs.

Multi-Channel Remote

1

Using the Channel Selector select the desired channel (channel indicator will briefly be lit).

2

On the remote, press and hold the UP and DOWN buttons simultaneously until the blind jogs.
Pairing a second remote

*Note: Finish programming the first remote before pairing a second remote

Single & Multi - Channel Remote

1

Using a paperclip or pen, press and hold the PROGRAM button on the original remote until the blind jogs once.

2

Using a paperclip or pen, press and hold the PROGRAM button on the new remote until the blind jogs once.
The second remote is now added to the memory and can be used to operate the blind.
Deleting a remote

Single & Multi - Channel Remote

1

Using a paperclip or pen, press and hold the program button on the original remote until the blind jogs once.
2

Using a paperclip oe pen, press the program button on the second remote until the blind jogs once. Second remote is now deleted and will not operate the blind.
## Adding a channel

Multi-Channel Remote

1

Select the desired channel you wish to duplicate by momentarily pressing the channel selector button on the multichannel remote.

2

Using a paperclip or pen, press and hold the program button on the remote until the blind jogs once.

3

Ensuring you are on the new channel press the program button on the remote until the blind jogs once. Additional (new) channel is now added to the motor memory and can be used to operate the blind.
Deleting a channel

Multi-Channel Remote

Channel Indicator

Channel Selector

1

On the remote select the desire channel to be deleted.

Press and hold

2

Using a paperclip or pen, press and hold the program button on the remote until the blind jogs once.
Press for 1 sec

New Channel

3

Press the program button on the remote until the blind jogs once. Channel is now deleted from the motor memory and will not operate the blind.
Adjusting the speed

* Motor has 4 speed settings, each action decreases speed by 1. When lower speed has been reached, the blind will no longer respond.
Decreasing the tilt speed

My Button

Down Button

1

Press the MY (stop) and DOWN buttons until the blind jogs. Speed has been decreased by 1.

Important

There are 4 speed settings, repeat as needed. The minimum setting has been reached when the motorised product briefly moves 3 times in one direction and then 3 times in the other direction.

Increasing the tilt speed

1

Press the MY (stop) and UP buttons until the blind jogs. Speed has been increased by 1.

Important

There are 4 speed settings, repeat as needed. The maximum setting has been reached when the motorised product briefly moves 3 times in one direction and then 3 times in the other direction.

Restore to factory settings

*All remotes and limits will be erased from the motor memory. Motor is now reset to factory mode.

### Delete all previous settings

1
Using a paperclip press and hold the program button located on the top of the motor casing until the blind jogs 3 times (approx. 12 secs.)
